

Component: Ideation and Stakeholder Needs Analysis

Stakeholder Identification and Needs Analysis: After taking survey of couple of stakeholders(In my case readers) as well as it was problem faced by me so i have taken real life problem that i had into consideration + stakeholders demand and made this app

This was about my stake holder analysis where i have taken input from as well as my own problems I had faced on my own in this reading journey.

Problem Statement:

“ A go to community for booklovers, where they can find the like minded people, share thoughts about the book, they can find new launches in the genre of interest and can have their reading journey very closely with other book lovers”

Ideation of Solutions:

One handy solution that is go to place for any book lovers. It has to be like social media for book lovers where they can be around like minded.

Posting book like social media posts - feature of like, sharing, comment and follow

Book talk hosting - a facility to host book talk online

Tracking reading progress of a book

Relevance to ICT Domain:

- Flutter (Tool developed and maintained by google)
- Firebase Auth
- Firebase Core
- Firebase Cloud
- Firestore database
- Firebase Storage
- Type Script

A developed Mobile app with all the features that ae mentioned above
